Brittany Rietz

PRODUCT DESIGN / PROTOTYPING IN CODE / AI DEVELOPER WORKFLOWS

Pasadena, California · brittanyrietz@gmail.com · b-rietz.github.io · linkedin.com/in/brittany-rietz-513060171

Designer-developer with 4+ years designing and building workflow tools and analytics dashboards in Salesforce for a national homebuilder's sales team. I prototype in code, test with real users, and ship UI to production through a human-checked agentic pipeline. Lately I've been designing for the moments where AI agent tools break down.

WORK EXPERIENCE

Lennar Corporation September 2022 – November 2026
Salesforce Developer / Software Engineer I · Remote
Previously Salesforce Intern · June – September 2022

- Designed and built a prioritized action queue in Lightning Web Components that replaced hunting across records with 1–2 tap completion, auto-advance, and gamified progress. Shaped in consultant demos; greenlit for production.
- Built and ran a Claude Code delivery pipeline, from ticket to tested pull request with human approval before every merge. Roughly doubled my delivery speed, caught bugs before review, and teammates adopted it.
- CRM Analytics subject-matter expert for dashboards used by 500+ sales users. Observed consultants, fixed calculations people distrusted, and reworked filters and layout; managers now use them in meetings and reviews.
- Added an in-dashboard component that lets Area Sales Managers log weekly sales plans, making them a tracked metric for the first time (in production).
- Designed and built an Agentforce AI agent that answers Internet Sales Consultants' common questions and recent-release changes (pre-launch).
- Standardized patterns across my features so screens looked and behaved the same.

PROJECTS

- **Warp Factories review inbox**, a self-initiated concept (2026). Ran a real factory on my own repo, found the agent's "what to check" note hidden in a two-line summary, and designed and built a keyboard-first inbox that sorts agent work by risk, matched to the current Factories UI. b-rietz.github.io/work/factory-floor.html

SKILLS

Design Workflow and interaction design · Prototyping in code · Design systems · Data visualization · User testing · Figma (basic)
Code and tools JavaScript · HTML/CSS · LWC · Apex · SQL · Jest · Warp · Claude Code · Terminal/CLI · Git/GitHub

CERTIFICATIONS AND EDUCATION

Six Salesforce certifications, including Agentforce Specialist and CRM Analytics and Einstein Discovery Consultant
Associate Degree in Psychology · Folsom Lake College · 2020

FILM

First Date (Sundance 2021 selection), supporting actor · Wrote, directed, and produced a 2021 short
